Projects

Movies Store — Project Repository

- A responsive movie store web application built using React and Tailwind CSS, powered by The Movie Database (TMDb) API. It displays trending movies, detailed movie pages, detailed actor pages and supports real-time search. Integrated Redux for state management and Axios for API requests. The UI is clean and modern, optimized for fast performance and mobile responsiveness.
- Tools Used: React JS, Tailwind CSS, Redux, TMDB APIs

Contacts Firebase App — Project Repository

- Developed a Contacts Web App using React JS, Tailwind CSS, and Firebase. The app allows users to add, view, and delete contacts, storing each contact's name and email securely in Firebase Realtime Database. It features a clean and responsive UI for a smooth user experience. Firebase handles the backend logic, including real-time data updates and storage. This project helped me understand CRUD operations and integration of cloud databases with React.
- Tools Used: React JS, Tailwind CSS, Firebase

Personal Portfolio Website — Project Repository

- Built a responsive personal portfolio using React.js to showcase my projects and skills. Integrated interactive animations with Parallax Tilt and added a functional contact form using EmailJS. The site is deployed on Vercel with a clean and modern UI.
- Tools Used: React JS, Tailwind CSS, React Parallax Tilt, EmailJS
